SAN ENGINEERING AND SUPPLY CO.,LTD.

HISTORY

San History

San Engineering and Supply Co.,Ltd.

Established and registered as a limited company on December 21, 1998 with authorized capital 1,000,000 baht. The company made service work on regrinding sharpening and designing all kinds of cutting tool for machine. With the business glow up the company therefore the first office and factory were established at 323/627 soi 29 moo.4 Saimai Rd. Saimai Bangkok 10220 Line Up

- 2000 The company moves to Shiangkong Bangplee and import many kind of machine. Vertical grinding machine, Grinding edge machine For improve and supporting the production process.
- 2003 Moves to small factory at Triumph Center work on mass process improve with new machine Turning, Profile grinding etc.
- 2006 The company open new plant at 104 Ratanachok Moo12 Bangpla Bangplee Samutprakarn 10540 and import new high technology e.g. CNC Machines E-WAG Laser, WIRE-CUT,CNC TOOL
- Present The company expanded factory area to 1600 sqm corporate by Marketing, Production ,Planning ,QA&QC Finishing and Packing ,Shipping section.

Over 100 persons Responsibility is at the very core of how we conduct business. As stated in our values, all parts of cutting tool are driven to be responsible, committed, innovative and respectful.

Location 104/87 Moo.12 Bangpla Bangplee Samutprakarn 10540

VISION

Research and Development
The Product high performance as world standard

MISSION

- High Quality Product
- On time Delivery
- Stable as Promised
- Improve and Develop working

PRODUCTS

SPECIAL CUTTING TOOLS

Manufacture

The Special Cutting Tools are customized Shape , Dimension and Precision products which are manufacture as per customer requirement.

This category consists of Insert , Boring tool , Drill , Endmill ,Reamer and others related tools. In addition , We are able to manufacture tools as small as 0.2 mm. in diameter with tolerance of ± 0.001 mm. and 0.002 mm. in run-out. These small cutting tools are suitable for small workpieces such as Watch parts, Hard disk drive parts and Automotive fuel injector parts, etc.

PRODUCTS

San Engineering and Supply Co., Ltd. is a manufacturer of precision cutting tools and grinding tools that made of PCD, Carbide and HSS, including high precision tools for electronics manufacturing, automotive parts, aerospace parts and other critical manufacturing related industrial products, both in Thailand and abroad.

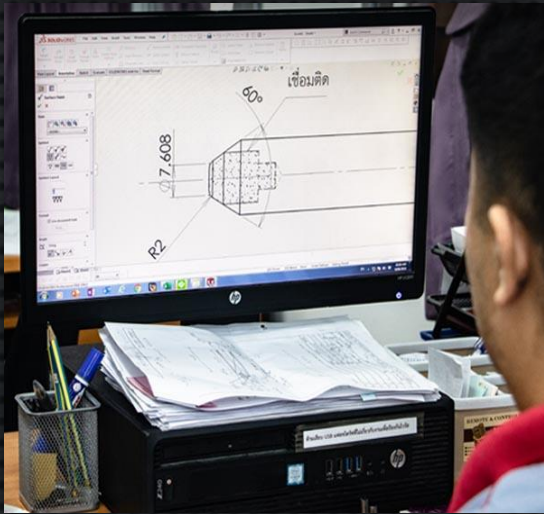

We provide our customer comprehensive services as follows

- Cutting edge design
- Cutting edge regrinding
- Special Cutting Tools
- Cutting edge manufacturing
- Cutting edge modifying
- Laser Cutting edge Diamond PCD Tools

SERVICES

SPECIAL CUTTING TOOLS Retip and Regrinding services

We offer retip and regrinding services for CBN, PCD, Carbide and HSS tools in line of Form cutters Drills, Endmills, Taps ,Hob Cutter, Broach Cutter and all types of cutting tools upon customer request and to those who have not satisfied with grinding quality experiences. We are pleased to ensure customer satisfaction by our highest quality services.

With the use of manufacturing technology, the company has improved and developed the ability of production and quality inspection continuously at all levels of manufacturing process to make a contribution to the success of our customers.

SERVICES

Upon requested , We could utilities our recent tool ,Equipment and Machines to support our customers requirement. These Services are as follow

High Precision 3D Laser scan measurement.

Automatic scan by ZOLLER universal measuring machine

 ZOLLER – Genius 3M

 ZOLLER – Smile

 Keyence VR-5000
3D Surface Scan

Cuttings tool inspection system

● PG 1000 (EURO – TECH CORP)

3D Measurement by coordinate measuring machine (CMM)

● Mitutoyo , Beyond – Crysta C

SERVICES

Balancing Services

● HAIMER TOOL Dynamic Comfort

▲ CNC Grinding Wheels Pack Balancing

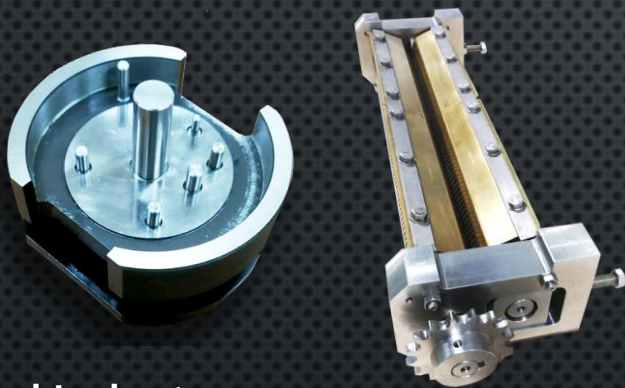

▲ Milling Tool Holder Balancing

SERVICES

Equipment repair / overhaul services to support

▲ General Industrial

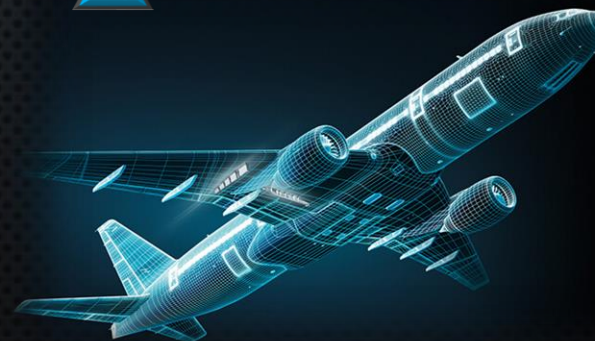

▲ Food Industry

▲ Automotive Industry

▲ Aerospace Industry

QUALITY ASSURANCE

Quality Control 100% Process

Quality Control Team

SAN Engineering and Supply We have a Quality Control Department responsible for inspect every piece with continuous inspection. From the quality control team with high performance measuring instruments that used advanced technology and highest standards of accuracy and precision. To check the workpiece corrected dimension and the cutting edge according to customer's drawings before delivery.

STANDARD AND CERTIFICATE

STANDARD ISO 9001 : 2015

OUR PARTNER

Reliable partnerships are key

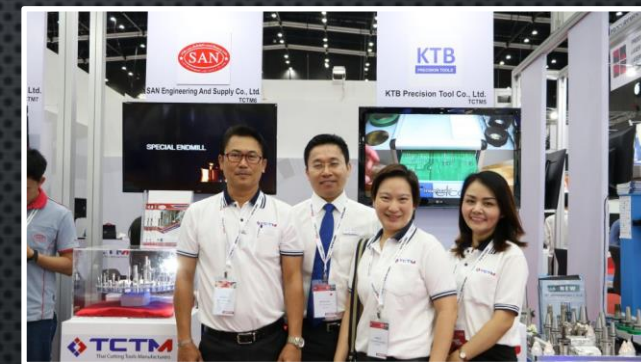

The good partnerships we working quality products are accepted by customers. both domestically and internationally, for example, and many more

EVENTS & ACTIVITIES

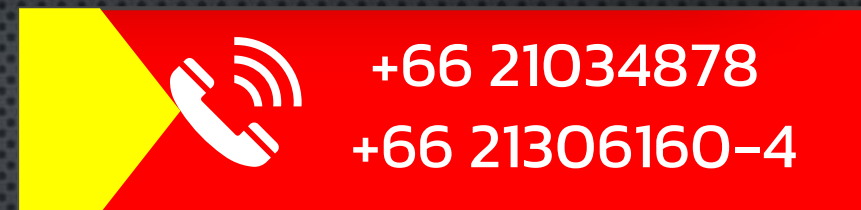

SAN focuses on raising the skills and knowledge San staff and products with workshops and master classes. Every year we joint machine and metal exhibition.
